EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Brett Sylvester on 06/19/2009.

The application has been amended as follows:

1. In claim 7 line 3, please replace "1 to 6" with --1, 2 or 4--.
2. In claim 12 line 1, please replace "any one of claims 8 to 11" with --claim 8--.
3. In claim 12 line 2, please replace "compound" with --oxide--.
4. In claim 13 line 2, please replace "any one of claims 10 to 12" with --claim 10--.
5. In claim 13 line 2, please replace "wherein" with --wherein said--.
6. In claim 14 line 3, please replace "any one of claims 8 to 13" with --claim 8--.

Election/Restrictions

Claims 7-14, 21 and 22 directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 7-14, 21 and 22, directed to the process of making or using an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action**

mailed on 04/02/2008 is hereby withdrawn. In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

1. Independent claim 1 and the claims dependent thereon have been allowed because none of the references of record teach or suggest a catalyst for a Fischer-Tropsch reaction, obtained by supporting a ruthenium compound on a support composed of a manganese oxide and an aluminum oxide, which is treated with an aqueous alkaline solution and subsequently subjected to calcination treatment in an air at 150-500C.
2. Independent claim 7 and the claims dependent thereon have been allowed because none of the references of record teach or suggest a process for producing hydrocarbons using a catalyst for a Fischer-Tropsch reaction, obtained by supporting a ruthenium compound on a support composed of a manganese oxide and an aluminum oxide, which is treated with an aqueous alkaline solution and subsequently subjected to calcination treatment in an air at 150-500C.

3. Independent claim 8 and the claims dependent thereon have been allowed because none of the references of record teach or suggest a process for producing a hydrocarbon-producing catalyst for a Fischer-Tropsch reaction, obtained by supporting a ruthenium compound on a support composed of a manganese oxide and an aluminum oxide, which is treated with an aqueous alkaline solution and subsequently subjected to calcination treatment in an air at 150-500C.

4. Independent claim 14 has been allowed because none of the references of record teach or suggest a process for producing hydrocarbons using a catalyst for a Fischer-Tropsch reaction, obtained by supporting a ruthenium compound on a support composed of a manganese oxide and an aluminum oxide, which is treated with an aqueous alkaline solution and subsequently subjected to calcination treatment in an air at 150-500C.

5. Independent claim 21 and the claims dependent thereon have been allowed because none of the references of record teach or suggest a process for producing hydrocarbons using a catalyst for a Fischer-Tropsch reaction, obtained by supporting a ruthenium compound on a support composed of a manganese oxide and an aluminum oxide, which is treated with an aqueous alkaline solution and subsequently subjected to calcination treatment in an air at 150-500C.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 1, 2, 4, 7-14, 17, 21 and 22 have been allowed.
